EMAIL SUBJECT:

Strategic Partnership Proposal — Ghana's One Million Coders Programme (Techbridge University College)

Dear [Minister/Director Name],

I write from Techbridge University College to introduce a strategic partnership opportunity for Ghana's One Million Coders Programme.

Techbridge is Ghana's leading technical institution (Oyibi, Greater Accra) with ~200 quality-focused students, four accredited industrial-aligned degree programmes, and proven delivery across Product Design, Fashion Technology, Jewellery Design, and Digital Media. We bring operational readiness, institutional credibility, and deep local policy alignment—plus campus infrastructure ready to scale.

SmartBridge brings a global AI-native learning platform (Skill Wallet) proven across 3,000+ institutions and 2+ million learners worldwide.

Together, we propose a **three-entity alliance**:

- SmartBridge India provides the global technology platform
- SmartBridge Ghana manages in-country implementation
- Techbridge provides campus infrastructure, accredited programmes, and sovereign data stewardship

The outcome: World-class digital skills training for Ghana's one million young people, with 100% Ghanaian control, measurable employment outcomes, and 60% economic retention within Ghana's domestic economy.

Programme can launch within 8 weeks of partnership ratification, using Techbridge's existing infrastructure and personnel—no build phase required.

I invite you to a technical synchronisation workshop to discuss the strategic vision, deployment roadmap, and governance structures. I have attached:

- SmartGhana Interactive Proposal (digital presentation)
- Alliance Brief PDF (formal 3-page document)
- Implementation Roadmap (5-phase, 32-week deployment)

Next steps: Please let me know your availability for a meeting in **May/June 2026** to discuss how Techbridge, SmartBridge, and the Government of Ghana can jointly transform digital workforce readiness.

I look forward to partnering to build Ghana's digital future.

Best regards,

Daniel Frempong Twum
Head of ICT & Special Adviser to the Founder
Techbridge University College

 Oyibi, Greater Accra, Ghana

P.S. — This proposal aligns directly with Ghana's National Digital Transformation Strategy, the Ministry of Education's digital literacy targets, the Ministry of Trade's sectoral export development agenda, and the Youth and Employment Agency's workforce readiness mandate. We are ready to commence immediately upon government approval.
